

## First Frost Rally 2009

# Last minute instructions:

It turns out we're not perfect after all. Two instructions are missing from Leg B Section 2 of Novice and Expert Instructions:

29.93 Turn Right

30.08 Forced Left

The OPP have notified us that the Santa Clause Parade is running in Collingwood today. Expect extra traffic on Hwy 24 / 124, and possibly along the first road running north in Leg B Section 1.

Roads are expected to be muddy with underlying frost. This may cause some vehicle drift, even while traveling in straight lines. We also found small patches of ice in shadow covered roads. Take extra caution if you are not using winter tires!

Several Hydro crews were erecting hydro poles in Leg A. No roads were blocked, but there were a few construction zones. We do not expect these crews to be present today, but please take caution in any construction zones, and take a Time Allowance if you are delayed.

It may be dark out before you finish Leg C. Please check that your tail lights and headlights aren't covered in mud before starting this section.
